DETAILED ACTION

1. This Office Action responds to the amendment filed on 12/19/2006 and interviews conducted on 12/19/2006 and 1/4/2007. Claims 1-59 are pending, wherein claims 1-5,30-32,40-48 have been amended and claims 14-29,34-39,49-59 are withdrawn from consideration as being directed to non-elected invention with traverse. Claims 1-13,30-33,40-48 have been examined and are allowed, wherein claims 14-29,34-39,49-59 are subjected to the following Examiner's Amendment.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Jack P. Friedman (Reg. No. 44,688) on 1/4/2007.

The application has been amended as follows:

In the claims:

As per **claims 14-29,34-39,49-59**, the claims have been cancelled.

Allowable Subject Matter

3. **Claims 1-13,30-33,40-48** are allowed.

4. The following is an examiner's statement of reasons for allowance:

As per **claims 1-13,30-33,40-48**, the independent claims 1,30,40, from which the respective claims depend, recite the method/computer readable medium implementing

a method/computer readable medium comprising a model configured to be used by a computer readable program code, for modeling a characteristic C that is distributed within a domain, comprising the inventive steps/means of generated the subsidiary equations based on the generated probability density function as claimed, or inventive features of having the model involving the subsidiary equations associated with the probability density function as claimed, from which the characteristic C is to be modeled, which the prior arts made of record failed to teach or suggest. In particular, the various prior arts made various methods/systems for modeling various characteristics involving probability density function, uncertainty and equations (see especially **Reichmuth et al**, US Patent No. 6,194,670, especially col. 7, line 43 to col. 8, line 59; **Rovinelli et al.**, US Patent Application Publication No. 2006/0004608, especially paragraphs [0099], [0124], [0254]; **Henry et al.**, US Patent Application Publication No. 2006/0287840, especially paragraphs [0165], [0107]; **Wall et al.**, US Patent No. 7,131,107, especially col. 12, line 31 to col. 14, line 14). However, none of the prior arts made of record teach or suggest the inventive steps/means/features as claimed. Accordingly, the claimed invention is novel and un-obvious over the prior arts made of record.

Conclusion

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
